

Hilton Head Sea Pines Golf Clubhouse & Beach House

INDUSTRY: Recreation

LOCATION: Atlanta, GA

SCOPE: Structured Cable,
Audio Visual, Security

SIZE: 250,000 SF

NTI CLIENT: Cooper Carry

Client Objective

The Hilton Head Sea Pines Plantation Golf Clubhouse and Beach House has the goal to refresh their guest's spirit, encourage the unscripted, and help guests return to the classic family vacation. The owners give a first-class experience to anyone that steps inside and the surrounding artwork, architecture, and amenities exhibits the Hilton Head community's elegance.

NTI helped design the technology for this beautiful recreational project. The Golf Clubhouse is 37,000 SF and is a multipurpose facility. It is made to accommodate two golf courses and has been designed to host PGA tours. Inside the clubhouse, there is a 4,000 SF locker room, pro shop, 2,200 SF banquet event room, grill & bar, and storage for up to 160 golf carts. To top it off, it has a wrap-around porch great for relaxing after a long day on the course.

Summary

Planning & Design – Planning and design of the technology infrastructure for data/voice, security, MATV/CATV cabling, Security, Audio Visual and Control Systems.

Cabling Design - Produced everything from the equipment room layout to outlet details and included construction documents for hardwired and wireless systems.

MATV/CATV - The design including junction boxes, TV locations, splitters, taps, and amplifiers.

Security - The security systems were designed specifically to the project's defined objective, including intrusion detection and CCTV.

Audio Visual - All audio visual systems were based on client direction and included construction documents and recommendations for specific solutions.
