

1587 Prime, a modern American steakhouse inside the Loews Kansas City Hotel, was founded by Chiefs stars Patrick Mahomes and Travis Kelce. Opened in September 2025, the two-story upscale venue features football-inspired design elements—including a stadium tunnel entrance and red marble accents—offering a uniquely local dining experience.

Location Kansas City, MO

Size ~10,000 SF

Design Services Structured Cable, IT, & Security

Client Noble 33

1587 Prime

Client Objective

NTI had the pleasure of designing the low-voltage systems for levels one and two of this 10,000 sf restaurant, including the lobby, office, bar, kitchen, dining area, private dining area, washrooms, and wine cellar spaces.

After space planning, we designed the infrastructure. This process included the drawings for the cabling systems (including telephone, data, and voice), security, and wireless networks.

As the technology consultant for this premier restaurant, NTI provided expert guidance in developing the essential infrastructure that supports smooth daily operations to deliver an exceptional dining experience for every guest.

NTI Solutions in this Project

Structured Cabling

Standards-based copper/fiber infrastructure, equipment rooms, and pathways following TIA/EIA, ANSI, and BICSI guidelines.

IT

Information Transport System supporting voice, POS, PMS, administrative LAN, wireless networks, and construction oversight.

Security

CCTV camera elevations, monitoring stations, and digital video recorders for site surveillance.
