

The American Red Cross has the goal to prevent and alleviate human suffering in the face of emergencies by mobilizing volunteers and donors. The same year it celebrated its 100th anniversary in Indiana, the Indianapolis Red Cross moved from its headquarters.

Location	Indianapolis, IN
Size	26,000 SF
Design Services	Structured Cable, AV, & Security
Client	CSO Architects

American Red Cross

Client Objective

Their new headquarters has approximately 26,000 SF which resulted from a three-way swap of sorts. The city bought the old Red Cross building to relocate Fire Station 7 and city fire headquarters from their location in the 500 block of Massachusetts Avenue.

The new Indianapolis Red Cross headquarters serves 87 counties. "We are 50% of the blood supply in the state of Indiana. We provide life-saving health and safety education, CPR, first aid," according to CEO Chad Priest. "We respond to disasters domestically and internationally. We do five or six of those a night in Indiana, mostly home fires."

NTI Solutions in this Project

Structured Cabling

Physical infrastructure detailing cable, patch panels, racks, cable management, terminations, and construction administration oversight.

Security

CCTV cameras, door contacts, alarm systems, monitors, DVR units, system testing, and training.

AV

Displays, projectors, speakers, control panels, input plates, lighting coordination, and TV distribution systems.
