

Atlanta United Training Facility

Client Objective

The facility includes a 25,000 GSF headquarters building and parking on a 31-acre site.

The facility was created to foster openness and an aspirational environment. The building faces the fields so academy players, employees, and first-team players can feel connected and focused on the club. The first-team locker room is oval-shaped with no corners to promote unity. The academy locker rooms are built the same way. The complex also includes two in-ground hydrotherapy pools, a full-service kitchen, and tactics and media room.

NTI provided security system consulting, design, construction documents, and construction administration for the Atlanta United soccer complex who has the goal to develop a culture that encourages the personal development of skills and abilities of all players in a nurturing environment.

Location	Marietta, GA
Size	25,000 SF
Design Services	Structured Cable, AV, & Security
Client	TVS

NTI Solutions in this Project

Structured Cabling

Campus-wide cabling infrastructure supporting network connectivity for site ingress/egress and future expansion areas.

Security

Comprehensive CCTV coverage, multi-point access control, glass break sensors, and off-hour intrusion alarms.

AV

Centrally networked security office monitoring stations and remote video display viewing capabilities.
