# BrightView

## Client Objective

ASD® has been selected as the technology consultant for several Brightview Senior Living projects. As the design division of ASD®, NTI has provided the Division 27 & 28 system design for the Brightview projects, including Brightview Columbia, MD.

Brightview Assisted Living in Columbia, MD, has a Garden Level, terrace Level, and four floors. The building comprises ~190,000 GSF and contains 170 living units (approximately 10 unit types) with support space. Support space includes the lobby/reception, admin offices, café, multipurpose room, dining rooms, theater, library and computer room, bar, billiard room, salon, and fitness space.

## NTI Solutions in this Project

### Structured Cabling

Design complete cabling systems, equipment rooms, outlets, and wired or wireless infrastructure.

### Security

We design custom security solutions, including access control, intrusion detection, and CCTV.

### AV

We build custom AV plans, construction documents, and targeted technology recommendations.
