

Gaylord Pacific Resort and Convention Center

Client Objective

NTI provided technology design consultation, documentation, and construction administration for the Gaylord Pacific Resort & Convention Center in Chula Vista, California. Just minutes from San Diego, this 22-story, 1.8-million-square-foot Marriott property features 1,600 guest rooms, a 275,000-square-foot convention center, multiple restaurants, a spa, and outdoor recreation overlooking the Pacific. Despite a 36-month construction timeline and \$40 million in delays from pandemic, supply-chain, and inflation hurdles, the city persevered to open the resort in 2025. NTI is proud to have delivered the low-voltage design to help create exceptional experiences for future guests.

The Gaylord Pacific Resort and Convention center has the mission “to enhance the lives of [their] customers by creating and enabling unsurpassed vacation and leisure experiences.

Location Chula Vista, CA

Size ~1.8 Million SF

Design Services Structured Cabling, AV, & Security

Client HKS Architects

NTI Solutions in this Project

Structured Cabling

Standards-compliant copper, fiber, and coaxial infrastructure supporting property-wide data, voice, and media pathways.

IT

Cabling infrastructure powering PBX voice, POS, PMS, LAN, time clocks, and property-wide internet access.

Security

Complete design for video surveillance, video management software, intrusion detection, and strategic alarm controls.

AV

Comprehensive designs and specifications for meeting rooms, ballrooms, public spaces, and MATV/CATV distribution.
