

Grand Kona Resort Condominiums

Client Objective

NTI had the pleasure of being the technology consultant for this beautiful condominium. Located on the oceanfront in Kailua-Kona, Hawaii, the condos' view is exquisite and unlike any other.

It is a 4-story 134,000 GSF building with 48 condos. The lobby is 4,300 SF and includes common spaces. Our design scope also included 38,000 SF of parking.

The Grand Kona Resort Condominiums wants guests to experience a "sensory escape and the aloha spirit any time of the year."

Location	Kailua-Kona, HI
Size	134,000 SF
Design Services	Structured Cabling, AV, & Security
Client	HKS Architects

NTI Solutions in this Project

Structured Cabling

Copper and fiber optic infrastructure supporting administrative LAN, wireless networks, and voice services.

Security

Integrated video surveillance, access control readers, intrusion detection, and strategic alarm systems design.

AV

Coaxial cabling, splitters, taps, and amplifiers designed to support complete television distribution systems.
