

Jefferson County Coroner / Medical Examiner Facility

Client Objective

Located in central Birmingham near major medical and legal hubs, this 32,000-square-foot facility supports specialized investigative and medical teams. The layout features dedicated forensic spaces, an isolation room, an expanded examination area, secure evidence storage, consultation offices, briefing rooms, and private family reception areas, alongside an on-site records center.

Our team designed and implemented the facility's low-voltage systems from planning through rollout. We deployed a scalable structured cabling network for voice, data, and Wi-Fi, paired with an integrated security system featuring precision CCTV and smart access control.

The Jefferson County Coroner and Medical Examiner's Office elevates public service within an expansive, state-of-the-art facility optimized for forensic excellence.

Location	Birmingham, AL
Size	32,000 SF
Design Services	Structured Cable, AV, IT, & Security
Client	Hays Cheatwood Consulting, Inc.

NTI Solutions in this Project

Structured Cabling

Standards-compliant copper and fiber optic pathways, equipment rooms, and backbone cabling infrastructure.

IT

High-performance network infrastructure powering voice, PMS, POS, and building-wide wireless access.

Security

Multi-layered CCTV systems, card access, duress alarms, and continuous video monitoring stations.

AV

Property-wide infrastructure design supporting television, media, and evolving hospitality technology systems.
