

Kefi has the goal to bring together parents and children in a unique learning environment where the children have the opportunity to grow and thrive.

Location	Atlanta, GA
Size	~32,000 SF
Design Services	Structured Cable, IT, AV, & Security
Client	BLUR Workshop LLC

Kefi

Client Objective

NTI is proud to have been the technology consultant for this new unique learning/play environment for children and their parents. The areas include a parent lounge & work area, fun field (central play, story cave, toy tropolis), music & dance area, toddler lounge, toy testing lab, retail area, listening lounge, and a coffee shop & café.

KEFI needed technology that will enhance the experience for the end-user but also be flexible and easily adaptable. NTI helped design the AV infrastructure to support the interactive learning systems including the enhanced speaker system for the Story Cave. We also designed the basic AV systems such as the background music and displays with connectivity in the lobby, party spaces, parent pods, staff lounge, and the coffee shop & café.

NTI Solutions in this Project

Structured Cabling

Standards-based infrastructure design and specifications following TIA/EIA, ANSI, and BICSI guidelines.

IT

Facility-wide technology infrastructure coordination, contractor oversight, RFI responses, and site observations.

Security

Collaborative design and construction administration oversight ensuring compliant security infrastructure installation.

AV

Detailed audio-visual system drawings and specifications designed to support future technological advancements.
