

Loews Hotels has been around for over 70 years, first started by the Tisch family, and has the mission to make every guest feel like family and to welcome them as such.

Location Kansas City, MO

Size 400,000+ SF

Design Services Structured Cabling, AV, & Security

Client Cooper Carry

Loews Kansas City

Client Objective

Three generations after starting the company and Jonathan Tisch, the chairman and CEO, is keeping it all in the family. Loews Hotels are one-of-a-kind luxury, upper scale hotels that are located throughout the US and Canada. Headquarters in New York, Loew's plan on expanding in urban settings and resort destinations across the world.

NTI is proud to have served as the technology consultant for the new Loews Kansas City Hotel. We lead the planning and design services for the facilities infrastructure and the systems that rely upon it.

This Loews Hotel is over 400,000 GSF and has 800 guestrooms to start. The hotel includes about 60,000 SF of meeting and event space, including the largest ballroom in Kansas City. It has an indoor saltwater pool, a lobby bar, restaurant, luxury spa, and a state of the art fitness center.

NTI Solutions in this Project

Structured Cabling

Designed complete cabling infrastructure, racks, patch panels, terminations, labeling, and construction administration oversight.

Security

Comprehensive design for CCTV cameras, door contacts, alarms, monitors, DVRs, cabling, and testing.

AV

Complete system design including speakers, displays, projectors, control panels, and integrated lighting coordination.
