Client	Cooper Carry

Milton City Hall

Client Objective

NTI served on the design team as a technology consultant for the Milton City Hall project. The new city hall is a two-story building that's 32,000 SF and includes a community center building. The exterior architecture integrates historic Milton elements and the interior architecture designed to foster collaboration. The public areas' design allows the community to interact with various city departments in an open environment with lots of natural light. Energy efficiency and many sustainable design practices were incorporated.

Departments within the building that are included, Public Works, City Clerk, Finance, Parks & Recreation, Public Information and Marketing, Economic Development, City Manager, council chambers, and a community meeting area.

NTI Solutions in this Project

Structured Cabling

Horizontal and vertical cabling infrastructure, equipment room layouts, pathways, and outlet details.

IT

Cabling pathways supporting voice, data, POS, PMS, administrative LAN, and wireless networks.

Security

Complete design for CCTV cameras, monitors, duress alarms, door contacts, and motion detectors.

AV

Meeting room technology, display systems, public audio, MATV/CATV distribution, and AV control.
