

Rent the Runway (RTR) was co-Founded in 2009 by two best friends Jenn Hyman and Jenny Fleiss with the goal to empower women everyday through fashion.

Location	Arlington, TX
Size	300,000 SF
Design Services	Structured Cable, IT, & Security
Client	ASD, Inc.

Rent the Runway (Arlington)

Client Objective

Jenn had the idea to rent designer items instead of purchasing them after she had seen her sister buy an expensive dress for a wedding.

Started out of Harvard Business School, Jenn and Jenny brought their idea to life and had a pop-up shop on Harvard's campus which was a success. Since then, they have had pop-up shops in various cities. The girls eventually opened a standalone store in New York City. Their first fulfillment center is in Secaucus, NJ, and has about 1,100 employees and 200 more in the call center.

NTI had the pleasure of working on their second fulfillment center in Arlington, TX which is also their first fully automated warehouse. RTR said that this fulfillment center will help cut shipping times and continue to expand its merchandise.

NTI provided technology planning and design services for the facility's infrastructure and the systems that rely upon it. We began with space planning. We then planned and designed the infrastructure, including the drawings for cabling systems, data, voice, security, and wireless networks.

NTI Solutions in this Project

Structured Cabling

Standards-based copper/fiber infrastructure, equipment rooms, pathways, and cabling per TIA/EIA and BICSI guidelines.

IT

Information Transport System infrastructure supporting data networks, wireless systems, and contractor administration oversight.

Security

CCTV cameras, monitors, DVR digital video recorders, and card access control system designs.
