Ritz Carlton

Client Objective

Located in NYC’s NoMad neighborhood—a growing hub for creative and tech firms— this 38-story mixed-use development features 250 guestrooms, 16 branded residences, and state-of-the-art amenities. Property highlights include two five-star restaurants, a rooftop bar, spa, fitness center, landscaped plaza, ballroom, and meeting space. Branded residences offer owners luxury hotel access and the option to rent out their homes through the hotel.

Selected directly by the owner, NTI provided technology consultation, design, and construction administration to help bring this upscale Marriott-branded project to life.

NTI Solutions in this Project

Structured Cabling

Standards-compliant copper and fiber optic cabling backbone supporting all voice and data systems.

IT

Infrastructure supporting PBX voice, POS, PMS, administrative LAN, timekeeping, and property-wide internet.

Security

Video surveillance, archiving software, intrusion detection, motion sensors, and central alarm control panels.

AV

Complete designs for meeting rooms, public background music, sound systems, and MATV/CATV distribution.
