

State Farm Insurance

Client Objective

State Farm's regional hub is located at Park Center in Dunwoody, Georgia—a transit-connected, mixed-use development designed by Cooper Carry and built by KDC. As the largest corporate office project in Metro Atlanta, the campus totals 2.2 million square feet of office space and nearly 100,000 square feet of retail, dining, and entertainment.

Technology design for the project was delivered across two key phases:

- Phase I (Building I): A 21-story, 585,000-square-foot tower featuring retail and a fitness center. ASD designed the structured cabling and security systems, completing work in 2017.
- Phase II (Building II): A 22-story, 670,000-square-foot office tower occupied by State Farm. NTI partnered with ASD to design the building's low-voltage systems (Divisions 27 & 28), including structured cabling, security systems, a Security Operations Center, campus-wide Wi-Fi, and AV documentation.

For 100 years, the mission of State Farm Insurance has and continues to be to help people manage the risks of everyday life, recover from the unexpected, and realize their dreams.

Location	Atlanta, GA
Size	670,000 SF
Design Services	Structured Cable, IT, AV, & Security
Client	Cooper Carry

NTI Solutions in this Project

Structured Cabling

Physical infrastructure including cabling, patch panels, racks, cable management, terminations, labeling, and certifications.

IT

Contractor inquiry coordination, site visits, workmanship verification, and adherence to system design specifications.

Security

Comprehensive CCTV camera systems, door contacts, alarms, monitors, DVRs, testing, and operational training.

AV

Television distribution design detailing signal amplifiers, taps, terminations, faceplates, and media infrastructure.
