Client	HKS

VISA Atlanta

Client Objective

NTI designed the complete low-voltage systems for the office complex, covering its Innovation Center, hospitality lounge, conference rooms, social hub, and core utility spaces. Our scope encompassed:

- **Structured Cabling & Wi-Fi:** Complete telephone, data, and voice cabling infrastructure, supporting individual workstations and the high-performance Wi-Fi network backbone.
- **Security Systems:** Strategic CCTV coverage alongside smart access controls at all entry points and elevators for floor-by-floor management.
- **Audio/Visual Integration:** Seamless AV systems in select meeting rooms, including controls for lighting, displays, sound, projectors, and automated shades, supported by organized server rack layouts in primary distribution rooms.

From initial space planning through technical execution, NTI provided end-to-end technology consultation to power the modern workplace.

NTI Solutions in this Project

Structured Cabling

Standards-compliant copper and fiber pathways, equipment rooms, and cabling infrastructure per BICSI guidelines.

IT

Network infrastructure supporting voice, POS, PMS, administrative LAN, and property-wide wireless services.

Security

CCTV cameras, digital video recorders, card access systems, and duress alarms at key locations.

AV

Infrastructure design and specifications supporting television, media systems, and future facility technology advancements.
